

RECIRCULATING CHILLER WATER COOLED LTCHI9-11

RECIRCULATING CHILLER WATER COOLED

LTCHI9-11

Also known as Laboratory Water Chiller.

LTCHI9-11 RECIRCULATING CHILLER WATER COOLED

The well-known product spleen compressor, high-efficiency shell and tube condenser, evaporator combination, super refrigeration, power saving PID microcomputer full-function control, easy to operate, can accurately control the water temperature within 3°C~35°C.

Unique new design stainless steel opening Type thermal insulation water tank, easy to clean and repair, reasonable internal pipeline layout, effectively reducing energy consumption.

Copper pipes are welded with Smick L30345% silver electrode, with high density and long life.

With current overload protection, high and low voltage switch, delay protection, over temperature protection, antifreeze, abnormal indication system.

SPECIFICATIONS

Model	LTCHI9-11
Freezing capacity	
kw	69.8 kw
Compressor	
Power	12.5hpx2
Condensor(Water Chiller)	
Type	Tube-in-shell Condensor
Water tank capacity	250 L
Pump	
Power kw	3 hp
Weight	800 kg
