

IMMUNO AUTOSTAINER LTHIS11-5

IMMUNO AUTOSTAINER LTHIS11-5

Used in Histology, Cytology, Hematology, Pathology, and Microbiology staining.

Also known as Tissue dyeing, Slide Stainer.

LTHIS11-5 IMMUNO AUTOSTAINER

Open system, Suitable for various kinds of specimen. True hands free, walk away, overnight operation. Easy Windows™ based programming, password protection. Allows for several stainers using single computer simultaneously. User-specified protocols/User's own reagents, several runs per day. Robust, proven construction and operation. No disposable pipette tips. Per-run reagent volume checks.

SPECIFICATIONS

Model	LTHIS11-5
Slides Capacity	48
Reagents Capacity	64
Minimum dropping reagent	50 µl
Dropping reagent increment	50 µl, 100 µl, 150 µl, 200 µl
Maximal output power	≤ 350 VA
Working noise	≤ 60 dB (A)
Application	IHC, HE more
Dimension (mm)	1015x665x520
Power supply	220 V or 110 V
Rated current	1.6 A
Weight	116 kgs
